

E.F. Winslow

Customized Whole House Water Filtration Systems

The Problem: Often water is not always of optimal quality. Characteristics such as blue/green stains, iron, rust, bad tastes, odors (chlorine) and discoloration can cause numerous problems for people and laundry as well as plumbing fixtures.

The Solution: To solve these problems, based on water analysis, E.F. Winslow will recommend the type of filtration media necessary to bring the water to the best possible quality.

How do I take a sample?

Run water at kitchen sink for one minute and put water in sample container provided (please call and we will mail you one).

Where to take sample?

You can either take to the water sample to one of the places listed below (please keep receipt and we will credit the cost of analysis on your proposal). Or, you can send us the sample along with a check for \$75.00 and we will take it to the Barnstable Court House to have it tested. If E.F. Winslow installs the filtration system we will credit the \$75.00 on your proposal.

E.F. Winslow
8 Reardon Circle
South Yarmouth, MA 02664
(508) 394-7778

Barnstable Court House: 375-6605
Envirotech - Sandwich: 888-6460

What needs to be tested?

- * Iron
- * Manganese
- * PH
- * Tannins
- * Hardness
- * Sodium
- * Hydrogen sulfide, if water smells like rotten eggs

What happens next?

Once you receive your water analysis forward it to EF Winslow (if you had it tested on your own). Our Plumbing Estimator will customize a water filtration system for your home, and we will mail you a proposal. If you decide to install the system, the estimator will meet you at your house to review the system and installation with you.

Please note: The process of having the water tested and getting a proposal takes approximately 2-3 weeks.
